*A place to slow down, get closer to nature
and rediscover the joy of simple things.*

Green tsavorite farm
a farm stay near Varkala
Trivandrum, Kerala, India.

Come a little closer

There are places you visit, and there are places you experience. Green tsavorite is a seven acre farm where nature, food, people and simple moments come together. Here, **sustainable living** is not a concept, it is part of everyday life. From **permaculture in practice and agroforestry to rainwater harvesting** and caring for **biodiversity**, the farm is shaped around living with the land rather than simply using it. Come with an open mind, slow down for a while, and see what you discover.

A large photograph of a person standing on a small, low-profile raft made of logs and branches, navigating a narrow, calm river. The river's water is a milky, light blue color. The banks are lined with thick, lush tropical vegetation, including numerous tall palm trees and dense green shrubs. The scene is brightly lit, suggesting a sunny day. Overlaid on the left side of the image is the text 'Step into a living landscape' in a white, elegant script font.

Step into a living landscape

Walk a little deeper and the farm begins to reveal itself. Spices, fruit trees, crops, birds and countless little sounds make every walk different. The farm is a living landscape, a food forest, where **regenerative farming**, biodiversity come together to create a place that keeps growing, changing and giving. Follow a trail, discover a spice, listen for a bird or simply stop and look around. The slower you go, the more there is to notice.

Get your hands into it

At Green tsavorite, nature is not something you simply look at. Pick something from a tree, **walk barefoot**, explore a trail, feel the earth beneath your feet, or get involved in the rhythm of the farm. Take a **forest bath**, **practise earthing**, play in the mud or simply sit beneath a tree and do absolutely nothing.

Good food. Good company.

Food tastes different when it comes from somewhere you have just explored.

Our **farm-to-table experience** begins with the land; fresh ingredients, seasonal organic produce and familiar flavours finding their way from the farm to the table.

Stay for the food but stay a little longer for the conversations.

Maybe this is
what you came looking for

Away from the noise, there is time to breathe, listen and simply be present.

Green tsavorite is a **non-alcoholic, non-smoking farm retreat**, a space created for those who want to step away from the usual pace and reconnect with what surrounds them. A walk through the trees, a quiet morning, birdsong or an evening around the fire can sometimes do more than we expect.

You may arrive looking for a day out and leave feeling like you have had a little time for yourself.

You came to experience the farm, but perhaps the real experience was something closer to yourself. A little nature, a little play, good food and unhurried time have a way of putting things back into perspective. Sometimes, all we need is a little space to slow down, breathe deeply and be present. Perhaps that is what mindful experiences are about, reconnecting with what matters.

Walk. Explore. Discover.

Living closer to the land

At Green Tavorite, experiencing nature also means understanding our place within it. We believe in growing with the land, not simply using it — through **permaculture, sustainable living, regenerative farming and biodiversity**. We conserve water, reduce waste, reuse wherever possible and make conscious choices towards a **lower carbon footprint**. From the food we grow to the way we care for the farm, every small choice is an opportunity to live a little more responsibly.

Because when we take care of the land, the land takes care of us.

*Come. Slow down Experience. Reconnect.
